ParkMobile® 360

One Platform to Manage Your Parking Operation

ParkMobile 360 gives you one unified platform to bring together all of the different technologies used to run your parking operation. Rather than having to use a wide variety of administrative systems, ParkMobile 360 allows you to push information to all of your technology providers from a centralized location where you can manage policies, view consolidated reporting, and more.

Centralize the data from your parking technologies in one place.

Single-Space Meters

Multi-Space Kiosks

Gated Parking Technology

Enforcement

ParkMobile

Financial and Operational Reporting

Why ParkMobile 360?

Set and manage rates and policies in one centralized platform

Improve efficiency for enforcement with unified transactional data

Push rate and policy updates real-time to all technologies

Easily manage rates and view reports within an intuitive interface

Consolidate reporting across every technology of your operation

Merge data sources to make reconciling financial transactions easier

Skip the need for data conversion with a single API connection

Close loopholes that allow customers to exceed maximum parking time

Consolidate Your Data, Measure Your Performance

ParkMobile 360 consolidates all of your parking data, giving you a complete view of the performance metrics of your operation. From one easy-to-use web-based solution, you can manage your entire parking inventory, set preferences, administer policies, adjust rates, and create events. To monitor your operation's performance, you can easily track transactions and revenue, as well as payment methods, historical trends, and performance for individual zones. With ParkMobile 360, all of your data lives in one place. This ensures you have all of the information you need to stay up-to-date on your operation so that you are maximizing revenue potential and monitoring any possible issues.

Put the power of ParkMobile 360 to work for your parking operation.
