

An End-to-End Solution for Parking Payments, Validation, and Enforcement

ParkMobile's seamless integration with Ballparc gives parking operators a smarter way to manage their locations and events with digital parking payments and enforcement.

ParkMobile + Ballparc Benefits:

- Easy way to collect and validate digital parking payments
- One integrated solution for payments, events, and enforcement
- On-street, open lot, and gated garage capabilities
- Intuitive user interface, making it easy for enforcement officers
- Ability to maximize revenue and manage violations with an online dashboard

How It Works

Enforcement

The customer pays for parking with the ParkMobile app.

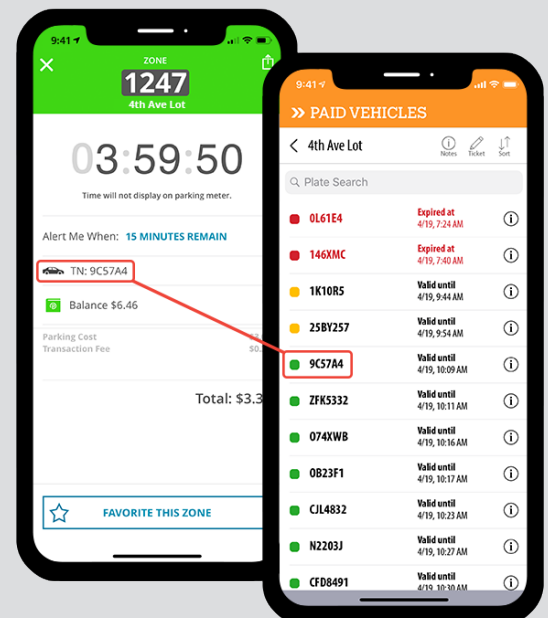

The information syncs in real-time to the Ballparc enforcement application.

A local enforcement officer uses the Ballparc handheld to search for a user's license plate.

For inactive or expired sessions, enforcement can issue a citation right from their smartphone.

How It Works

Events

The customer makes a parking reservation in the ParkMobile app or on the website.

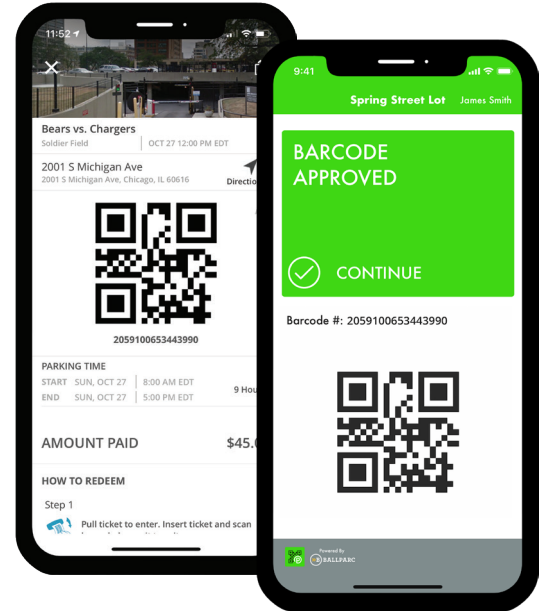

The information syncs in real-time to the Ballparc events application.

The parking attendant scans and validates the prepaid parking pass.

The customer can also create custom hang tags, season passes, and VIP lists.

Why ParkMobile?

- 1 in 13 drivers now use ParkMobile
- Available in 41 of the top 100 cities and over 400 exclusive municipalities
- Experience with 400+ venues, 17,000+ events, and 10 million+ reservations
